## **DT300 Starfire Drape Mold** **Fused Glass Forming Re-Imagined**

The innovative Drop-Thru Mold Forming System enables fusers to create a vase shape in a kiln that is remarkably similar to an off-hand blown vessel. This mold kit consists of 3 ceramic components:

- The C100 Foot Casting Mold to create a 2 7/8" (7.3 cm) diameter cast glass foot using our Scrap-casting technique.
- The DT300 Tripod Base to support the Drop-Thru Ring and center the Cast Glass Foot.
- The DT305 Fluted Drop-Thru Ring to shape the vase and guide the drop onto the cast foot disk.

Turning the ring 1/3 of a revolution will position it at 3 different levels (see images below) to produce 3 distinctly different vase heights.

This product is in the final testing phase now and it will go into production within the next few weeks. Stay tuned to our website [www.JoyOfFusing.com](http://www.JoyOfFusing.com) for the official launch and availability announcement.

**DROP THRU**  
**F FORMING SYSTEM**

Highest Position  
Creates a vase 4 5/8" (11.7 cm) High

Middle Position  
Creates a vase 4 1/8" (10.5 cm) High

Lowest Position  
Creates a vase 3 1/2" (9 cm) High

**Comming Soon**
